

MAIScut

Circular sawblade for fibre cement boards

High Performance

Choosing the right tool is key to guaranteeing an excellent quality finish when cutting fibre cement products. Frezite has developed a sawblade specially dedicated to cut this range of products which is being used in various applications: external cladding, tiles, water reservoirs, and many more. The geometry of the Polycrystalline Diamond edge, as well as the specially designed body shape, guarantee an excellent cut and a long lasting tool life. Produced with the latest generation, state of the art equipment, Frezite's MAIScut sawblade assures high profitability and economy.

MAIScut sawblade vs Traditional saws

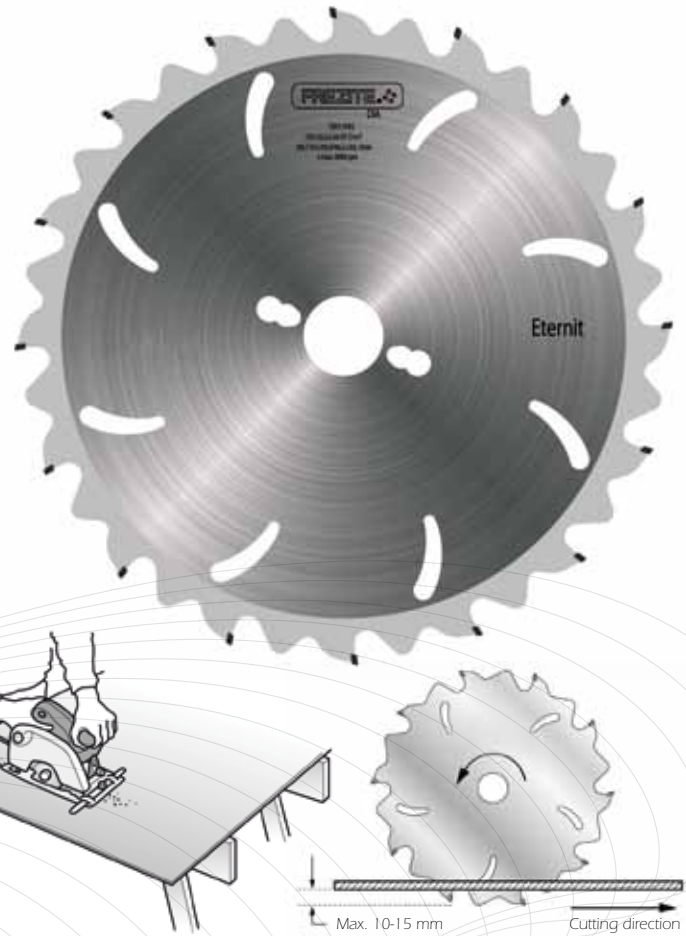

In comparison with the traditional saws, the MAIScut sawblade from Frezite will allow a reduction in waste, improving the atmosphere at the work location and protecting the health of its users.

Advantages

- Economical, due to longer lasting tool life
- Excellent finishing
- Smaller power consumption
- Faster cutting speed
- Reduced production of cutting dust

Applications

- Hand fed portable machines
- Hand fed stationary machines

D	b	d	Z	rpm	Ref.
120	1,8	20	8	6500	A887.120.008.20
160	2,4	20	10	4800	A887.160.010.20
190	2,4	30	12	4000	A887.190.012.30
216	2,6	30	14	3500	A887.216.014.30
250	2,6	30	16	3000	A887.250.016.30
300	2,8	30	20	2800	A887.300.020.30

The cutting speed should be 40-50 m/sec

When the cut is being made with a portable machine, the good side of the board must be placed face down. For machines using a saw from below, the good side must be placed facing up.

Big Challenges, Great Solutions!
