

PLUS

Circular saw blade for cutting MDF and chipboards panels

High wear resistance

Specially suited for the furniture industry, FREZITE presents a saw blade with high wear resistant carbide teeth, guaranteeing greater tool profitability. Suitable for cutting chipboard or MDF with high density coatings. With a low noise design, will ensure a more comfortable working environment.

APPLICATION

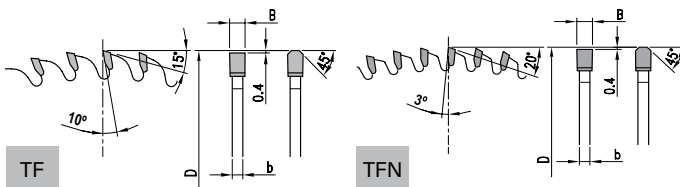

- For cutting of high density coating wood based materials (laminated boards, HPL, etc.).

MACHINES

- Sliding table saw.
- Vertical panel sizing.
- Table circular saws.

TECHNICAL INFORMATION

- With triple chip flat grinded carbide teeth (HW).
- Saw with negative cutting angle, suitable for vertical panel sizing.

ADVANTAGES

- High wear resistance.
- Long lasting therefore economic (longer life between sharpenings).
- Excellent finishing.
